

What is XSite Office?

XSite Office is a web-based (SaaS) Gas Station & C-Store store management software solution that allows you to manage inventory, edit items, print reports, create purchase orders and monitor performance from any device with an Internet connection. Manage one location, or multiple locations at one time, to maximize productivity.

Features:

- Custom report builder allows reporting on information that is specifically relevant to your company
- History, bookmarks and recent event log on main page allows quick navigation and easy accessibility to common tasks
- Enables consistency of control and information throughout multiple locations
- Reduces human errors and data discrepancies between locations

Margin History

Changed	Price	Case Cost	Last Cost	Average Cost	Margin
December 16, 2015 7 days ago	3.49	12.60	1.58	1.58	54.7%
October 5, 2015 3 months ago	3.12	12.60	1.58	1.58	49.4%
October 5, 2015 3 months ago	3.12	12.60	1.57	1.57	49.7%
May 15, 2015 7 months ago	3.12	0.00	0.00	0.00	0.0%

Inventory

Site	QOH	Average Cost	Total Cost
Waterville GrabNGo 1	35	1.58	55.30
Nackawic GrabNGo 2	0	1.58	0.00
Halifax Airport 3	10	1.58	15.80
		1.58	71.10

View inventory at multiple locations

Track changes to product margin

Inventory

Quickly and easily track or change QOH levels for individual items or for multiple products. Changes can be made through bulk batch counts or item inventory valuation reports.

Batch Changes

Make batch price changes based on department and price. Change the vendor for a group of items from the central location and send it the information to all applicable sites.

Users

A user can easily login to the head office server with a user ID and password. This account is used to log the user's actions within the system. Roles can be defined for a group of users who have the same set of permissions, each user is assigned to a role to determine what they are allowed to do within the system.

Sales by Department

Sites

Each of the sites in your company are assigned a site record. This record is used to denote the items, suppliers, etc., that are available for that specific site. Each site is also assigned to a single region. This region is used to easily make changes for all the sites within a single region.
